### TC-A ZONE

#### Residential Density Calculation Worksheet

Town Center Unified Zone Development Plan and subsequent land-use permit applications must submit a Density Calculation Worksheet that show the number of allowable and required dwelling units for each development application. Residential density must be calculated for each Town Center zone separately. Gross developable acreage (SMC 21.07.050H) is used to determine density or project floor areas. Please complete calculations for gross developable acreage and use the results to calculate allocated and maximum densities below. [Refer to Directors Interpretation: SMC 21B.25.030 and SMC 21B.75.020 – Town Center Density](#)
