

George Davis Creek Fish Passage & Storm Improvement Project

Proposed Stream Improvements

Project Elements

- 1. Stream relocated onto City-owned property (City project element).
- 2. Stream through new culvert at East Lake Sammamish Shore Lane NE (King County project element).
- 3. Stream through new culvert at East Lake Sammamish Regional Trail (King County project element).
- 4. Stream through new bridge at East Lake Sammamish Parkway NE (City project element).
- 5. Stream reconstructed through property along existing stream alignment (City project element).
- 6. Retain existing stream channel.
- 7. Remove diversion dam (City project element). Provides access to 2,600 feet of upstream spawning habitat.
